

Join ECO outdoors wherever you are: your yard, a nearby open field or park, on a walk around the neighborhood, or a nature trail (please pay attention to public closures!)

- Use all your senses, except for taste! What do you see? What do you hear? What do you smell? What do you feel?
- Zoom in, zoom out. Look at an object from far away and make observations, then get up close to it and make more observations.
- Be curious, respectful, and responsible. Leave plants growing where they are and observe them without picking them. Keep a safe distance from critters and observe them with your eyes only.

Something hidden. Describe it:	The color purple	Our state flower, Oregon grape	A plant growing in an interesting way. Describe it:	Signs of an animal home. Describe it:
Signs of decomposition	Pollination in action	BONUS: a mystery organism.*	Something living inside a puddle	Something that smells sweet
3 different kinds of bird calls. Describe them:	Roots	Something alive (maybe tree bark) that feels rough	A plant that feels fuzzy	A vine
Signs of insect life. Describe it:	Something that lives underground. You might need to dig!	Draw a picture of a cloud:	Soil in 2 different colors	A seed
Two different kinds of pollen. Draw it:	Something budding. Describe it:	A fungus	Sit in the sun. How does it make you feel?	The color orange

* An organism is defined as an individual animal, plant, or single-celled life form. Look for something you've never seen before!

Share your scavenger hunt checklist with us on Facebook, Instagram, or Twitter, or through email at info@ecologyoutdoors.org be sure to tag #exploringwiththeco to be featured!
